Studio One 3 Software

Instantly familiar—yet nothing feels like it. Studio One® 3 contains everything you'd expect from a modern digital audio powerhouse. Once you touch its fast, flow-oriented, drag-and-drop interface, you'll realize Studio One® 3 was built by creative people for creative music production. Scores of new features and enhancements, yet manages to be even faster and easier to use.

NEW FEATURES

- **Arranger Track** – it has never been easier to work “pattern-style” in a timeline-based sequencer/DAW.
- **Scratch Pads** – a powerful, yet simple new workflow innovation that will change the way you create music.
- **Browser 3.0** – getting loops, effects, instruments, and presets is even faster with tag-based musical search.
- **Extended FX Chains** – a fast, powerful, and elegant way to add new dimensions to your sonic palette.
- **Multi Instruments** – lets you stack multiple synths and Instruments on a single Instrument Track
- **Macro Controls** – can be assigned to the most critical instrument or effect parameters.
- **Mai Tai** – new polyphonic analog modeling synth.
- **Presence XT Sampler** – like Presence on steroids.
- **Reinvented Synthesis and Instrument Engine**
- **Note FX** – process the instrument note data, rather than the audio output signal.
- **Rotor, Bitcrusher Audio Effects**
- **New, customizable, high-dpi UI with multi-touch support**
- **Studio One Remote for iPad®**
- **Mixer Improvements, including Track/Mixer Sync**
- **Smart, User-definable Tool palette**
- **More of everything—except the bloat** output

Notion Software

Bring musical inspirations to life and enhance your creativity with the blazingly fast and intuitive Notion™ 6 music composition and performance environment. Compose when and how you want—on Mac®, PC, or mobile—even with your own handwriting*. Take projects to the next level with deep studio integration. Hear and perform music with the full realism of samples by the London Symphony Orchestra and more.

- Easily compose, playback, and edit music
- Best playback of any notation product, with samples by the London Symphony Orchestra, Soundiron, and more
- Perform scores using Notion™ as a live instrument and save your performance
- Create a score on a Mac or Windows computer and continue to edit on iPad or iPhone
- Write parts by hand and watch them convert to digital notation
- Get a polished sound with with PreSonus Studio One Native Effects Limiter, Compressor, and Pro EQ plug-ins
- Send audio and MIDI data directly to and from Studio One, or
- integrate Notion with other leading digital audio workstations via ReWire

Progression Software

Progression 3

673454002816

75.00

Guitar Notation Software - Progression 3 makes it easier than ever for you to write your ideas quickly and includes new effects from PreSonus Studio One, an enhanced chord library, and many notation and publishing improvements. Notation improvements make Progression 3 even faster and easier to use than previous versions, including an enharmonic spelling tool, cross-staff notation, and new shortcut sets. You also get an enhanced chord library with more library chords, user-created chords, and recent-chord recall.

Major new Progression 3 features include: • PreSonus plug-ins: Includes three PreSonus Native Effects™ plug-ins from Studio One®: Limiter, Compressor, EQ • Notation and tab: Many notation and tablature improvements make Progression the fastest and easiest composition software on the planet, including new enharmonic spelling tool, cross-staff notation, layout improvements, and new shortcut sets. There's a new Capo feature, too! • Chords: An enhanced chord library provides more library chords, user created chords, and Recent Chord Recall • Look and feel: The user interface has been redesigned to be more consistent with PreSonus' award-winning Studio One DAW • International localization: Available in English (U.S. and UK), French, German, Japanese, and Latin American Spanish • Display: Mac Retina display and Windows 8 touchscreen optimization

Studio Monitors

Eris E4.5

673454002632

335.00

Pair of affordable Studio Monitors • 4.5" Kevlar LF transducer + 1" low mass silk dome HF transducer • 50 watts Class AB power (25W + 25W) • 4-position Acoustic Space switch • Variable HF and Midrange controls • 3-position Low Cut switch • TRS & RCA rear inputs, 1/4" front aux input • Front panel volume control and 1/8" headphone jack

IMPORTANT SHIPPING INFORMATION: 2 speakers in one box, must be ordered as a pair

Eris E5

673454002175

249.00

2-way, bi-amped monitor speaker • 5.25-inch Kevlar® low-frequency transducer • 1-inch (25 mm), ultra-low-mass, silk-dome, high-frequency transducer • 70 watt, Class AB bi-amplification • Front-firing acoustic port for superior bass-frequency reproduction • Midrange (±6 dB, continuously variable), HF (±6 dB, continuously variable), High-Pass (Off, 80 Hz, 100 Hz) and Acoustic Space settings (flat, -2, -4 dB) for accurate mixing contour • RF interference, output current limiting, over-temperature, transient, and subsonic protection • Optimized, resonance-suppressing internal bracing • Balanced XLR/ -inch and unbalanced RCA inputs • 102 dB maximum continuous SPL

Price is per speaker.

Bluetooth Reference Monitors

Experience sound through true recording studio reference monitors with the controls that let you optimize your listening experience to your room environment and musical tastes.

The music and game sound tracks you listen to are mixed by professional audio engineers on highly accurate studio monitors that reveal every sonic detail. Now you can hear what they hear with Ceres. We started with one of our studio monitor designs and then added the convenience of Bluetooth® wireless for streaming audio from your mobile device.

Along with low-mass silk dome tweeters and rugged Kevlar woofers, Ceres has back panel controls to prove you own a true monitor speaker. Because what really sets Ceres apart from conventional home speakers are its back panel controls that integrate the speakers with your room environment and musical genre. You control the tone with continuously variable Treble and Midrange Controls. Customize bass with a 3-position Acoustic Space switch. No matter how you adjust your Ceres monitors, you'll be getting accurate recording studio sound.

Reference Microphone

PRM1

673453001918

185.00

Precision Reference Microphone • Provides an accurate reproduction of a room's sound characteristics for use with audio-analysis tools such as real-time analyzers (RTAs) and spectrographs • Requires phantom power • Employs a " pre-polarized electret-condenser capsule • Omnidirectional • Can handle up to 132 dB SPL and exhibits linear ("flat") frequency response between 20 Hz and 20 kHz • Narrow dynamic range, since it is intended to receive test frequencies, such as pink noise, at a fixed level. Therefore it is not recommended for recording purposes • Especially recommended for use with PreSonus Virtual StudioLive™ software with Smaart Measurement Technology™ and PreSonus StudioLive 24.4.2 and StudioLive 16.4.2 digital mixers. With this combination, you can have a complete, powerful, and affordable, audio-analysis and correction system • All-metal chassis • Includes clip, foam windscreen, and hard case.

Audiobox VSL USB Audio Interfaces

Cutting latency to under 2.5 ms, which is virtually inaudible, PreSonus has made a huge breakthrough with the AudioBox VSL audio / MIDI interfaces. Now you can monitor with effects (tracking without hearing effects and signal processing is like playing a video game with your eyes closed!) The flagship in PreSonus' new generation of USB 2.0 audio/MIDI interfaces • These interfaces deliver a combination of features, audio quality, and value unprecedented in this product category, including reverb and delay effects and the same Fat Channel compression, limiting, semi-parametric EQ, and high-pass filter, as the PreSonus StudioLive™ 16.0.2 digital mixer. It's a great choice for project studios, performing bands, school music labs, and a wide variety of corporate installations and other contractor applications.

- 24-bit / 96 kHz
- Bus-powered via USB 2.0
- Class A XMAX™ mic / instrument preamps
- True +48V phantom power
- LED clip indicator for each channel
- MIDI In/Out
- Mac®- and Windows®-compatible
- Rugged metal chassis
- **Software: Virtual StudioLive (VSL); Studio One Artist; 4+ GB of 3rd-party resources.**

<p>AUDIOBOX 22VSL</p> <p>Recording Interface with Virtual StudioLive™ • 2 in / 2 out USB 2.0 interface • 2 Class A XMAX™ mic /instrument preamps • 2 instrument inputs • 2 balanced main outputs • Headphone amplifier • VSL (Virtual Studio Live): 4x2 Kernel mode DSP mixer with StudioLive™ 16.0.2 Fat Channel dynamics processing & EQ for each analog input and its DAW return and two stereo effects buses with reverb & delay • Analog monitor mixing with playback/Input mix control knob • Clip lights for both channels • Rugged metal chassis • 1/3-rack unit form factor • INCLUDES Studio Magic Plug In Suite.</p>	673454001260	310.00

Audiobox USB96 Studio

673454006166

349.00

AudioBox USB96 Studio is a complete mobile recording kit for Mac or Windows that includes tightly integrated software and offers cool features that the competition can't match. Includes: AudioBoxUSB96 2-channel, USB interface for Mac, Windows, Studio One® Artist DAW software for Mac and Windows; • M7 large-diaphragm condenser mic • HD7 headphones • Nimit Free account for marketing and distribution.

Shipping July.

Audiobox iTwo Studio

673454002946

435.00

AudioBox iTwo Studio is a complete mobile recording kit for Mac, Windows, and iPad that includes tightly integrated software and offers cool features that the competition can't match, such as the ability to transfer songs wirelessly from Capture Duo for iPad to Studio One for Mac or PC • Includes: AudioBox™ iTwo bus-powered, 2-channel, USB/iPad audio/MIDI interface for Mac, Windows, and iPad; Studio One® Artist DAW software for Mac and Windows; Capture™ Duo recording software for iPad • M7 large-diaphragm condenser mic • HD7 headphones • Nimit Free account for marketing and distribution. • **INCLUDES Studio Magic Plug In Suite.**

Monitoring & Controllers

FaderPort 8

673454005480

875.00

8-channel Mix Production Controller • The FaderPort 8 features eight 100 mm motorized, touch-sensitive faders; digital scribble strip displays; HUI, Mackie Control, and native Studio One support; and a unique Session Navigator to make mixing and controlling your favorite DAW application quick and easy • 8 touch-sensitive, 100 mm long-throw, motorized fader • 8 high-definition Scribble Strip displays • Recording-transport, session, channel, and automation controls • Session Navigator provides quick control over Track Scrolling, Marker Navigation, Timeline Scrolling, and much more • OSX / Windows compatible with Native Studio One support and HUI and Mackie Control Universal emulation • USB 2.0 connectivity

FADERPORT

673454006645

235.00

Music Production USB / MIDI controller • Puts the feel, vibe, and efficiency back into music recording and production • No more clicking through menus and drawing automation edits with a mouse • Easy-to-use • Delivers complete transport control for fast, efficient recording • Motorized fader for writing fades and automation • Pan, mute, solo, and record enable can also be easily controlled, along with window selection, play, stop, record, and managing markers (locate points) • Foot switch jack also included for hands free punch-in/out recording • Works with all Mac or Windows-based recording software including Pro Tools, Cubase, Nuendo, Sonar, Digital Performer and more.

Suggested Retail Price List

	UPC	Sugg. Retail
<p>HP60</p> <p>6-Channel Headphone Amplifier • 6 ultra low-noise, high-output PreSonus headphone amplifiers • Audio inputs include two stereo main inputs (A and B), as well as external input for each channel allowing user to mix between three stereo audio streams (mix A, mix B, and external input "more me") • Stereo output available on each channel to send line level channel mixes to additional headphone amplifiers or monitor systems • Channel controls feature headphone level, mix between inputs A and B, external input volume, mute and mono • Also features talkback via external XLR microphone • Ultimate headphone amplification system delivering loud and clear headphone mixes for real-world recording situations.</p>	673454000690	549.00
		
<p>HP2</p> <p>Two Channel Personal Headphone Amplifier • 9V Battery or DC-powered, stereo headphone amplifier • Inputs: 2 female XLR connectors, Output: stereo, 1/8" phone connector • Volume and Pan control knobs, Stereo/Mono operation switch • Battery-health LED indicators • Includes belt clip, microphone stand mount socket, 2m cable • Perfect for driving wired in-ear monitors (IEMs), as well as headphones</p>	673454004438	199.00
		
<p>HP4</p> <p>Four Channel Headphone Distribution Amplifier • The new HP4 from PreSonus answers the project studio owner's needs for headphone distribution with professional specifications and more in a small package with an affordable price. The unit comes in a 1/3 rack space chassis similar to the TUBEpre. The HP4 accepts unbalanced or balanced inputs or outputs (1/4" TS/TRS). The input can either be set to stereo or mono. The mono selector button on the front channel simply copies both inputs to both sides. The HP4 features four discreet headphone outputs on the front panel each with its own volume potentiometer and 250mW of amplification per channel. Can you say quiet? PreSonus can with a -98 dB noise floor and wide frequency response. Also, the HP4 allows control over control room monitors with a separate volume potentiometer that can be muted using the MONITOR MUTE button. The HP4 is powered by an external wall mounted power supply. Can be rack mounted using MaxRack universal rack mounting kit.</p>	673454000423	235.00
		
<p>Monitor Station V2</p> <p>Little brother to the Central Station • Sits on the desktop • 4 headphone outputs • 3 monitor outputs • Switchable operation modes • 3 inputs • Phono inputs • 2 outputs • Talkback with footswitch • Separate source control for headphones • Dim level control • External power supply • Cue output level • Separate main/cue sources • backlit buttons. New Features: additional rear 1/8" headphone jack, S/PDIF input, integrated talkback microphone, intuitive top panel layout, individual speaker trim pots on rear, new black color scheme</p>	673454002823	549.00

--	-----	--------------

CENTRAL STATION PLUS

673454001345

1099.00

Passive Studio Control Center • Up to five stereo inputs (2 digital and 3 analog) • No compromise 24 Bit DAC for Digital Inputs – 115dB dynamic range • Completely passive audio path – no transistors or IC's • Up to three sets of monitor outputs; each with passive volume trims • Talkback microphone with volume to feed cue outputs • Both analog VU and digital LED meters • Front panel headphone jack with volume • MAIN and CUE Stereo Output each have independent input source

Includes CSR-1 Remote

Three sets of analog stereo inputs accommodate DAW/Mixer, Tape/CD, or Keyboard/Sampler outputs. Two of these analog inputs feature TRS Balanced jacks and the third stereo input features RCA inputs with a trim control for matching unbalanced signals. In addition, the Central Station will accommodate two digital inputs via S/PDIF or TOSLINK providing D/A conversion up to 24Bit/192kHz. This feature allows the user to monitor his DAW and CD outputs through the same converter for the most accurate A/B comparison. The DAC offers the highest possible audio quality with over 115dB dynamic range and robust analog circuitry. • Audio is passed through an all-passive network of components for the purest signal path – instead of running through active IC's and chips that color the sound • 3 sets of monitor outputs, each with their own passive stereo trim pots. The monitoring section also provides MUTE, DIM and MONO controls • Cue outputs can feed headphone boxes • Stereo MAIN line level output • Both analog VU and digital LED meters with PEAK HOLD and –6dB settings as well as a VU OFF button • Talkback feature allows the user to use an internal omni-directional mic or an external microphone. It can be controlled via the front panel, or using a momentary pedal into the rear 1/4" jack. An additional DB9 connector on the rear allows for a wired remote that controls VOLUME, TALKBACK, and MUTE functions.

Channel Strip

STUDIO CHANNEL

673454001000

535.00

Professional Channel Strip • The Studio Channel is a professional channel strip combining Class A tube preamplifier, VCA-based compressor and three-band parametric equalizer perfect for the professional and project studio. Great for all types of microphones, instruments, keyboards and synths, the Studio Channel has the sonic power and flexibility to achieve any tone you can dream of – luscious in your face vocals, crystal clear acoustic guitars, fat solid bass guitar, dynamic acoustic piano, cracking snare, punchy bass, huge MPC tracks and more.

• Class A vacuum tube microphone / instrument preamplifier • Tube gain and tube drive • Variable VCA compressor (threshold, ratio, attack, release, make up gain, auto, soft) • Three-band parametric EQ • Precision analog VU meter for gain reduction and output • EQ Pre/Post compressor switch • 80Hz high pass filter • 20dB pad • Phase invert • Rugged metal chassis • High headroom • Ultra low noise design

TUBEPre V2

673454001659

235.00

Mono Tube Preamp with Large Blue Backlit VU Meter • TubePre V2 is a fully professional tube preamp, with a dual-servo (no capacitors) gain stage • Even wider palette of sound options, and a much more focused tube saturation, than original TubePre • Upgraded to PreSonus' popular XMAX Class A solid-state preamp • 12AX7 dual-servo vacuum tube output stage • Input Gain control • 48V phantom power • 80 Hz high-pass filter • -20 dB pad • Instrument input select • Polarity-reverse switch • Backlit VU meter • Clip LED • Input/Output: 1 unbalanced " instrument input; 1 balanced XLR mic input; 1 unbalanced " line output; 1 balanced XLR line output • Compact 1/3U rack-mount chassis • External 12 VDC, 1A power supply.

BlueTUBE DP V2

673454001703

425.00

Stereo Tube Mic-pre with Dual Path Technology • Features PreSonus' top-of-the-line Class A XMAX™ mic preamplifier with 80 dB of variable gain • Dual path mic/instrument tube preamp • 2 input channels • 12AX7 vacuum tube gain stage • Tube Drive tube-saturation control • 48V phantom power • 80 Hz high-pass filter • -20 dB pad to reduce hot input levels • Polarity-reverse switch • Illuminated analog VU input-level meter • Input/Output: 2 balanced combo mic/unbalanced instrument inputs; 2 balanced XLR main (L/R) line outputs; 2 unbalanced " main (L/R) line outputs • Compact 1/2U chassis • External 12 VDC, 1A power supply • **Not MaxRack compatible.**

<p>DigiMAX DP88</p> <p>88x8 96 kHz Preamplifier / Converter with ADAT™ / Dual SMUX I/O - The next-generation DigiMax™ DP88 A/D/D/A converter is the perfect companion to expand the new PreSonus® Studio 192 Studio Command Center or any professional audio interface with ADAT I/O. Building on the DigiMax legacy, PreSonus has innovated on the eight-channel A/D converter again by adding eight fully recallable, digitally controlled, analog XMAX™ preamps with pristine audio quality up to 96 kHz. Like its predecessors, the DigiMax DP88 provides the connectivity and flexibility to make it a perfect fit in any professional or home studio environment.</p> <p>Features - Remote control your XMAX™ preamps from the front panel or from within your DAW using standard MIDI messages - DAC outputs expand the analog outputs of your audio interface for monitor mixes, speaker switching, and more - Direct A/D inputs let you connect a boutique preamp directly to the converter without repatching cables, thanks to per-channel front panel control - Audiophile-grade, Burr-Brown analog/digital/analog converters with 118 dB dynamic range - 24-bit operation at 44.1 kHz, 48 kHz, 88.2 kHz, and 96 kHz sampling rates - Tight integration with Studio 192 Studio Command Center lets you control preamp settings from Studio One 3 or UC Surface.</p>	673454003660	1285.00
<p>DigiMAX D8</p> <p>8-Channel Preamp with 24-bit/48 kHz ADAT Out - Featuring 8 award-winning class A XMAX mic preamps with 24-bit ADAT digital output. All eight preamps include variable trim control, 48V phantom power, ultra-fast acting LED metering and 20 dB pad. In addition, 2 instrument inputs are located on the front panel for direct Hi-Z instrument input. Balanced TRS direct analog outputs are located on the rear panel for routing and flexibility. The DigiMax D8 also includes word clock sync input for ultra-low jitter and robust synchronization. The DigiMax D8 is the perfect solution to add eight professional microphone preamplifiers to any digital recording system with ADAT optical lightpipe expansion capability including Digidesign's HD and 003 systems, RME, YAMAHA, Alesis, Mackie, and many others.</p> <p>Features - 8 XMAX class A microphone preamps w/ trim control - 24-bit resolution ADAT digital output - 44.1 and 48K sampling rates - External sync via BNC word clock input - Direct outputs on every channel - LED input metering - -20dB Pad on every channel.</p>	673454000089	735.00
<p>Dynamics Processors</p>		
<p>ACP88</p> <p>Eight Channel Compressor/Limiter/Gate - The ACP88 is the only eight-channel analog compressor/limiter with fully functional noise gates combined in a fully integrated unit and packed into 2 rack spaces. The ACP88 features full parameter control over threshold, attack, release, and ratio, as well as an AUTO function that provides for easy operation with minimal set-up time. This is the most solid value in dynamics processing in the industry! Internal power supply. 2U Rack</p>	673454000881	1699.00

StudioLive RML Mixers

Equally at home in houses of worship, schools, broadcast facilities, live venues, touring rigs, and recording studios, PreSonus® StudioLive® RML-series 32-channel, 25-bus, rack-mount Active Integration digital mixers are a versatile and flexible solution for live sound and recording.

Expandable and tightly integrated with state-of-the-art software, they boast combo mic/line inputs, recallable XMAX preamps, an integrated multitrack recording interface, advanced AVB networking, optional Dante™, and multiple control options. Yet they're easy to use, with a workflow that will let you focus on mixing, without being distracted by the technology.

ULT Series Live Sound Reinforcement Loudspeakers

ULT-series active loudspeakers combine the widest horizontal dispersion of any loudspeaker in their class with a focused vertical dispersion for an ultra-long throw. The result is even coverage throughout the space, enabling the audience to hear clearly wherever they are. Featuring PreSonus' proprietary Pivot X110 horn and plenty of Class D power in a lightweight design, ULT fullrange loudspeakers deliver first-rate speech intelligibility and natural music reproduction. A companion ULT18 active subwoofer delivers a powerful, clear, and accurate low-end punch in a compact design, making ULT-series systems ideal for both mobile use and permanent installations.

Live Sound Reinforcement Loudspeakers

3-way active loudspeakers combine high power and advanced coaxial configuration with the most powerful DSP engine ever built into a compact PA system. Through seamlessly integrated software, StudioLive AI speakers can be set up, adjusted and continuously monitored via wired or wireless remote control using Windows®, OS X® or iPad®. Tuned by master speaker designer Dave Gunness using Fulcrum Acoustic's trade-marked Temporal Equalization™ algorithms. Previously possible only using powerful outboard rack processors, TQ™ is used to manage horn reflections, linear time and amplitude anomalies correction, performance contouring, and dynamic and excursion limiting.

- Crisper stereo image
- Greater soundstage depth
- More separation between complex mix components
- Increased resistance to feedback
- More seamless transitions between distributed loudspeakers
- Less fatiguing listening experience at very high SPLs
- Exceptional clarity and coherence.

Price is per speaker.

SLS328i-B	673454003578	3099.00
------------------	--------------	---------

Black Version - StudioLive 328i cabinets are built for flown installations without handles and pole mounts. Internal grille cloth masks the drivers so that they blend seamlessly into their environments. A companion yoke mount is also available, as is an update to PreSonus' SL Room Control speaker-management software that allows the user to turn off the front-panel blue power-status LED. In all other respects the new StudioLive 328i-W (white) and 328i-B (black) are identical to the StudioLive 328AI.

Price is per speaker.

SLS328i-W	673454003394	3099.00
------------------	--------------	---------

White Version - Price is per speaker.
