<h2>USB Thunderbolt FireWire Series Audio Interfaces</h2>				
Babyface Pro 24-Channel 192 kHz bus-powered professional USB 2.0 Audio Interface • Latest generation super-low latency AD/DA converters, combined with RME's further improved SteadyClock III technology, result in exceptional specifications that will satisfy the most demanding of professionals. Babyface Pro's incredibly efficient design almost never requires an external power supply – it's perfectly stable on USB 3 bus power, and also most USB 2 ports, with no degradation in any technical specification. This makes it perfect for mobile recording, even with a pair of your favourite condenser microphones • Connectivity / Features • 12 Input and 12 Output channels • 4 x Analog Inputs (Mic, Line, Instrument) • 4 x Analog Outputs (2 x XLR, 2 x Phones) • 1 x ADAT I/O or 1 x SPDIF I/O optical • 1 x MIDI I/O • 1 x USB 2.0 (USB 3 compatible) • Digital Gain control on all inputs • Separate outputs for high and low impedance headphones • TotalMix FX (with EQ, Reverb, Delay)	BABYFACE-PRO	4260123363062	999.00	 no image available
DIGIFACE-USB 24 Bit / 192 kHz, 66-channel Hi-Performance USB 2.0 Audio Interface, 4x ADAT I/O	DFUSB	4260123362287	699.00	 no image available
DIGIFACE-Dante 24 Bit / 192 kHz, 256-channel Hi-Performance USB 3.0 Audio Interface, Dante I/O, MADI Coaxial I/O	DFDANTE	4260123363208	2079.00	 no image available
DIGIFACE-AVB 24 Bit / 192 kHz, 256-channel Hi-Performance USB 3.0 Audio Interface, AVB/TSN I/O	DFAVB	4260123363192	1399.00	 no image available
MADiface USB 24 Bit / 192 kHz, 128 Channel USB MADI Interface Breakout Box • Record/Playback channels: 64 in / 64 out • 2 x MADI I/O (optical and coaxial) • TotalMix • No external power supply required • Stand-alone mode operation • Seamless Redundancy Operation	MADI-USB	4260123362980	1349.00	 no image available

MAP Price List

	Product Number	UPC	MAP
Digital Audio Converters			
A32 DANTE	A32 DANTE	004023283118	4699.00
<p>32 in / 32 out AD/DA converter with Dante, coaxial and multi mode MADI and ADAT - The A32 Dante Version has an additional interface with 64 digital inputs and 64 digital outputs, which can be easily integrated into existing DANTE networks. Alternatively, with an interconnection of two A32 DANTEs, a live recording on the computer of up to 64 channels is possible at any time. In this case, a separate sound card (such as, for example, when using the ADAT or MADI ports) is not necessary.</p> <p>The intuitive operating concept and the redundancy options, as well as the multiple submix and routing possibilities, make the A32 DANTE an ideal component of every DANTE interconnected system.</p>			
 <p>no image available</p>			
A32 DANTE Single mode	A32 DANTE SINGLE	4313042884047	5299.00
<p>Single Mode Verion of A32 Dante - 32 in / 32 out AD/DA converter with Dante, coaxial and multi mode MADI and ADAT - The A32 Dante Version has an additional interface with 64 digital inputs and 64 digital outputs, which can be easily integrated into existing DANTE networks. Alternatively, with an interconnection of two A32 DANTEs, a live recording on the computer of up to 64 channels is possible at any time. In this case, a separate sound card (such as, for example, when using the ADAT or MADI ports) is not necessary.</p> <p>The intuitive operating concept and the redundancy options, as well as the multiple submix and routing possibilities, make the A32 DANTE an ideal component of every DANTE interconnected system.</p>			
 <p>no image available</p>			
A32	A32	0040232823121	3199.00
<p>32in/32out AD/DA MADI & ADAT Converter - The A32 is designed for MADI – the digital audio interface for professionals. Up to 64 channels can be transferred using a simple pair of glass fiber cables (or coaxial cable) spanning a distance of up to 1.2 miles.</p> <p>Thanks to the MIDI over MADI feature, the A32 can be remote controlled using MIDI data embedded in the same MADI cable. The audio transfer between the MADI input and MADI output is done with zero latency, so you can daisy chain multiple A32 without any added latency or delay compensation. Optional redundant power supply available for critical applications.</p>			
 <p>no image available</p>			
A32 SINGLE MODE	A32 SINGLE	N/A	3849.00
<p>32 in / 32 out AD/DA converter with coaxial and single mode MADI and ADAT - The A32 is designed for MADI – the digital audio interface for professionals. Up to 64 channels can be transferred using a simple pair of glass fiber cables (or coaxial cable) spanning a distance of up to 1.2 miles.</p> <p>Thanks to the MIDI over MADI feature, the A32 can be remote controlled using MIDI data embedded in the same MADI cable. The audio transfer between the MADI input and MADI output is done with zero latency, so you can daisy chain multiple A32 without any added latency or delay compensation. This is what we call plug-and-play!</p>			
 <p>no image available</p>			
A16 MK-II	A16 MK-II	40232823091	1799.00
<p>Analogue: 16 balanced TRS I/O - 24 bit / 192 kHz converters • MADI: optical MADI I/O (incl. MIDI over MADI) • ADAT: 2 x ADAT I/O (16 ch • BNC Wordclock • Two TFT displays with high-res level metering on all inputs and outputs • Input-gain and output-levels individually adjustable for each channel • 32 bit high performance ARM(TM) processor • Easy channel assignment with the graphical routing software • Preset management • Key lock • SMUX control • Remote software for the A16 MK-II via MIDI or MADI (MIDI over MADI) • Cascading of multiple A16 MK-II via MADI</p>
